

GDOE – FEMA Typhoon Mawar Report

as of March 17, 2025

The Guam Department of Education (GDOE) is working on securing FEMA reimbursements in the aftermath of Typhoon Mawar. To date, a claim totaling \$383,000 has been submitted for the reimbursement of locally funded air conditioning units at Astumbo Elementary School. Efforts are also ongoing to recover \$390,095.47 from FEMA and Guam Homeland Security for costs related to straight time, overtime, and materials incurred during the typhoon response.

Additionally, the Guam Education Financing Foundation has provided invoices to GDOE for repairs and material replacements at Astumbo Middle School and Liguán Elementary School, with an estimated cost of \$316,918.00. These invoices are currently being reviewed, and supporting documentation is being prepared for submission to Guam Homeland Security for reimbursement. Furthermore, GDOE has issued a request for quote (RFQ) for temporary classrooms to address critical needs. Vendor submissions are still pending, after which the package will be finalized and submitted to FEMA for approval.

Pending reimbursement total is estimated \$1,090,013.47.
